👤 PROFILE

I'm a Software Engineer who graduated from PUCIT. Currently, I am working as a Full Stack Developer at Tkxel. I am a Solution-Oriented Developer, lifelong learner, and Adventurer with a professional background having Computer Science Degree. I enjoy development because of the satisfaction I get from overcoming challenges. I have a great skill set in Ruby On Rails. I have strong communication and leadership capabilities as I have led multiple projects. I also have other skills like JS, JQuery, C++, Ruby, MVC, etc. I have a problem-solving mindset and a drive to see things through to completion. I am looking for a position that offers both personal and professional growth. I am committed to developing innovative and creative software solutions. Able to perform complete software development life cycle activities, can synchronize, and work efficiently in a team. I am motivated by the opportunity to be part of a System that helps people solve their regular tasks and make their lives easier.

I am working with Tkxel for the last 1 year and 5 months as a Full Stack Developer, The technologies I am working with are Ruby On Rails, React Js, JQuery, Bootstrap, offline and online syncing to the cloud, and many more.

Associate Software Engineer

2021 – 2022 | Lahore, Pakistan

I have almost 1 year of experience at Devsinc as a Fullstack Developer. The technologies I've worked with are Ruby, Ruby on Rails, jQuery, HTML, Bootstrap, CSS, and Javascript. I have also worked on Plaid API, which connects applications with financial institutions.

📁 PROJECTS

MD Ministerial Development, Professional Project

Currently, I am working on this project. This project is basically based on the educational and learning platform for churches, schools, and aged care. This project is live in 3 countries and growing very fast. The technologies I used in this project are Ruby on Rails, React Js, JQuery, Bootstrap, and many more.

Vendor Advisor, Professional Project

This is a professional project. I worked on it for 1 year. This project handles OTA Savings where you can monitor your OTA commissions automatically, and Provide Analytics for Businesses where All your revenues across your properties are available at any time on any device. Monitor your adjustments automatically. The track occupancy rate, ADR, RevPAR, and more, Gets together the Hotel Community where you Store, organize, and view all your contracts safely and easily., and provides a Marketplace where you can share inventory within your family of hotels. Seamlessly buy and sell from hotels without paying any fees.

Web Application for Bug Tracker, Semester Project

Bugzilla is a robust, featureful, and mature defect-tracking system, or bug-tracking system. Defect-tracking systems allow teams of developers to keep track of outstanding bugs, problems, issues, enhancement, and other change requests in their products effectively.
